

# Carl

## Passionate math teacher

Teaching is one of the most important profession that men ever invented hence I want to practise it in the best possible way.

### ACTIVITIES

Carl is 55 years old and lives in Moncalieri. He has worked in a small school nearby his neighbourhood since his graduation and was a witness of his institute changes. He pays a lot of attention to the quality of his courses and to the transparency towards the students' parents.

### GOALS AND DESIRES

Carl thinks that students' education should be delivered both at school and at home, so he would like to improve the communication towards students' parents, to be sure that they are always informed about the behaviour of their child. Moreover, he usually uses PowerPoints presentation during his lectures and he would like to share them with the students in an efficient way.

### DIGITAL TOOLS

### NEEDS

- Carl needs to communicate with the students' parents in a quick and efficient way;
- Carl would like to have a tool allowing him to publish his slides, making them accessible to all his students.

### OBSTACLES AND FRUSTRATIONS

- Carl had some troubles with few students in the past years, because they did not come to school and the parents did not know it. He is scared that it could happen again.
- Carl shares his teaching material by printing it and handing it out to the students during the lessons. He thinks that this approach is too inefficient and expensive on the long run.
