Group E – SPRINT#1 RETROSPECTIVE

Committed stories: 6 (from story#1 to story#6)

Successfully implemented stories: 6

Total story points for the sprint: 30

Problems that we faced:

- Initial organizational issues
- Lack of communication concerning the usage of the Boostrap framework and the layout in general
- Setup of mail environment
- Troubles with VersionControlSystem

How we plan to overcome the problems in the next sprint:

We are going to improve team communication by increasing the number of daily scrums (setting up one of them at least at the beginning of each lesson) and by warning all members as soon as an issue is encountered

Things that we are proud of:

- After an initial period of adjustment, we managed to overcome all the problems and we started working in a smoother way
- We created a fully OS and browser compatible website
- Until now, the website is correctly working
- We earned much more group agreement than before
- The website is responsive to many different devices
